Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Dr. Bjorklund provided a comprehensive overview of laser properties and various standards for laser eye safety and provided a table of outputs of the Slatkine device based on calculations using Slatkine's disclosed parameters. The calculations failed to yield any output within what is considered an eye safe level. Based on this, Mr. Eakin was to return the following day with claims based on calculations. The examiner met on 5/24/07 with Mr. Eakin to review the claims and committed to provide comments via telephone within two days.
